Dear Joshua,

I have just received a permit to register from Dean Herriott. As you predicted, I was notified of a seven credit deficiency in Genetics. The letter also contained some polite instructions about schedules and advisors. Most of the latter paragraphs, I presume, were more in the nature of a welcoming reassurance to new students than actually necessary procedure.

The Dean of the Medical School has granted me a leave of absence. Now the matter rests solely in the hands of the National Institute of Health. The U. S. P. H. Fellowships are not awarded until March 24, and so everything will be pending until that time.

I certainly wish to thank you again for the numerous arrangements which you have made!!

Very sincerely,

A handwritten signature in cursive script, appearing to read "Janey", with a long horizontal line extending to the right.
